Art Unit: 2835

1. This application is in condition for allowance except for the following formal matters:

A substitute specification and the claims are required pursuant to 37 CFR 1.125(a) because they appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

A substitute specification must not contain new matter. The substitute specification must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) and a statement that the substitute specification contains no new matter must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown.

2. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Allowable Subject Matter***

3. Claims 1-3 would be allowable if rewritten or amended to overcome the objection to their translation, set forth in this Office action.

4. The following is a statement of reasons for the indication of allowable subject matter: The claims 1-2 are allowable over the prior art of record for at least the reason that the prior art fails to teach or suggest a palm-size game protection case comprising: an upper lid; a lower lid, wherein a main unit of the palm-size game is sandwiched in between them; and wherein: said main palm-size game unit comprises two buckling holes on each of a front side and a rear side; said lower lid comprises: two locking catches on each of its front end and rear end to engage respective buckling holes on the main game unit; and a pair of rails each provided on a side of the lower lid; and wherein the upper lid comprising corresponding tracks for sliding in respective rails of the lower lid.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hino (US Patent 6,313,982); Lai et al (US Patent 6,757,161); Lammers-Meis et al (US Patent 6,819,549); Kim et al (US Patent 6,239,968); Richardson (US Patent 6,646,864) and Makamura et al (JP08046363).
